ACCESS

PROPERTY LEVEL ACCESS

Communication Posts

Your first line of access control unmanned, functional, and robust. Operations include communications, and access provision. IP Ready solution for operations from anywhere in the world via internet.

2 LOBBY LEVEL ACCESS

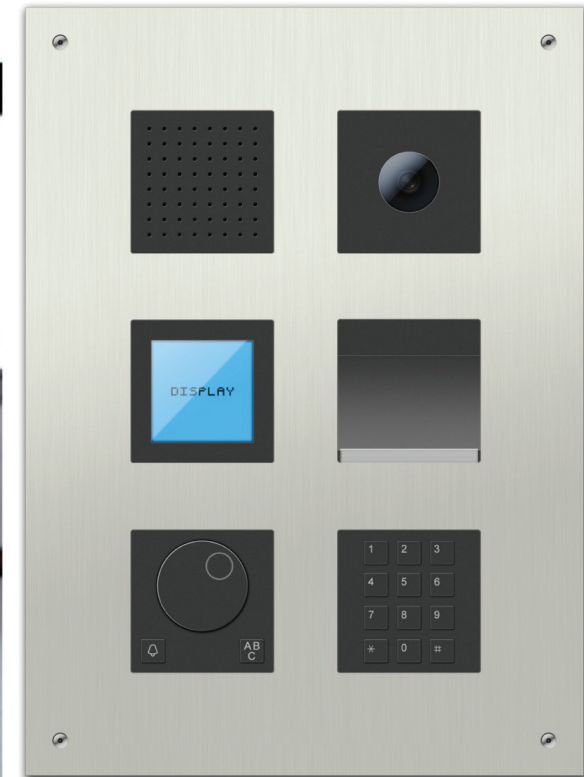

Lobby Panels

Concierge level applications include lobby panels equipped with camera, biometric scanner, language selections, information display.

3

PRIVATE LEVEL ACCESS

Lift Control Panels

Customized panels offering access to private areas via lifts leading to the apartments.

Branding and customization in finishes, materials, and languages offered.

Connect . Operate . Control Always . Anywhere

Remote connectivity worldwide via IP
Connectivity via GSM / Analog protocols
Control using various devices
Multi-level access
Alerts
Information
Manual hardware overrides

Auto pilot Sensor Technology.

Smart systems rely on various sensors for inputs to make intelligent decisions to keep things working in the background. Offering a peace of mind with virtually no user intervention.

AMBIENCE

3

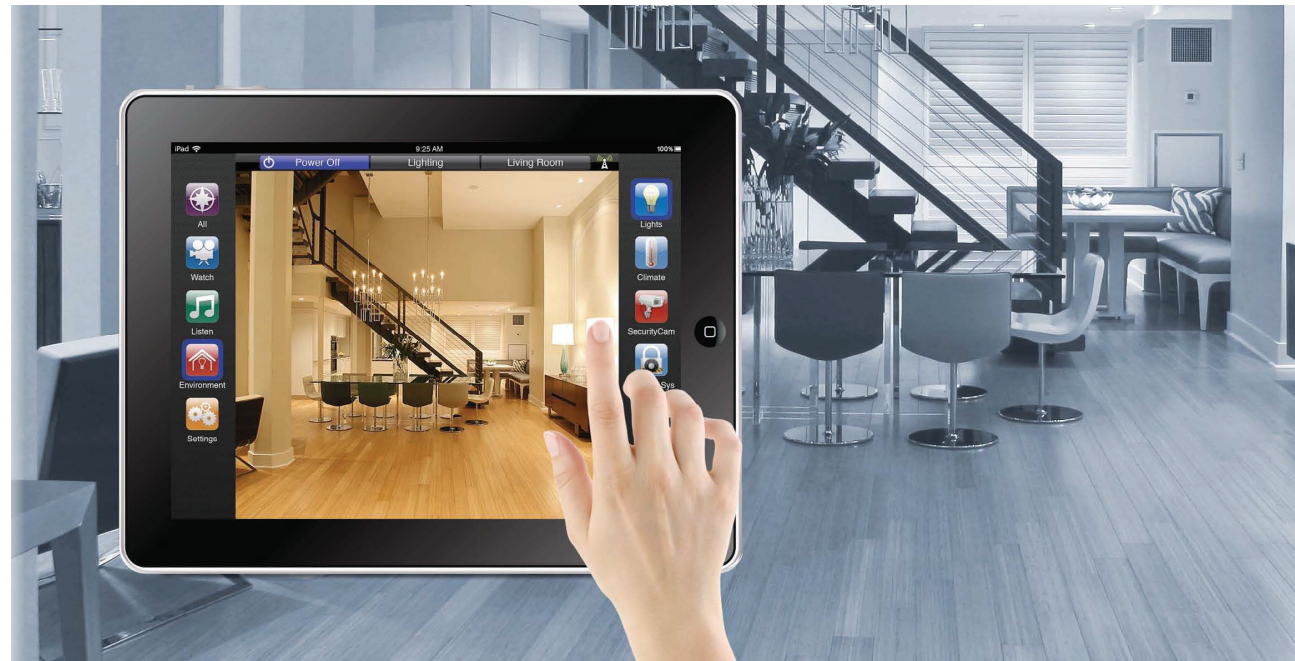

EFFICIENCY

CONTROL

Access remotely

Equipment and light controls operated using a range of wireless devices, touchpads, and key controls to remain in control. Always.

2 AMBIENCE

Personalization

Mood preferences, scene settings, comfortable ambience and zone lighting are achieved using high levels of personalization settings.

3

EFFICIENT

Go Green.

Efficient lighting systems sense the changes in available natural lights, and temperature to modulate the energy use for maximum comfort and savings.

Stand alone commercial energy savings

Solutions	Single Space Energy Savings
Occupancy / Vacancy sensing	20-60% lighting
Daylight harvesting	20-60% lighting
Personal control	10-20% lighting
Plug load control	35% plug load

Connect . Operate . Control Always . Anywhere

COMMUNICATE

CONTROL

FEEDBACK

COMMUNICATE

Multitude of devices

Modern homes use various sensors, controls, and systems to make them truly integrated. Every system must be compatible and communicative with the whole system.

2 CONTROL

Automatically

The control decisions could be made manually when needed and with system and environment feedback automatically to provide maximum comfort and savings.

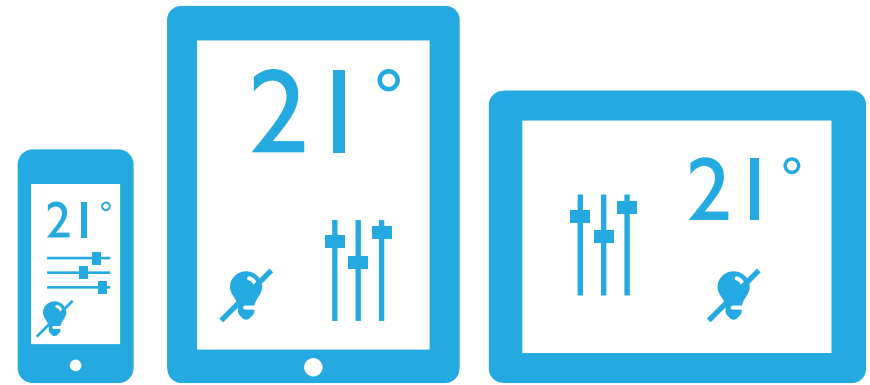

3 FEEDBACK

Status updates

With virtual access the system needs to stay updated at all times of each and every device status. BACNet protocols achieve this to keep everything in sync.

Connect . Operate . Control Always . Anywhere

Climate control
Zone controls
Daylight harvesting
Device sync
Remote access
Energy Efficiency

True Picture.

All systems communicate and respond to the required settings. Creating a comfortable ambience, maintaining climate, saving energy, and making decisions, all by themselves. Always.

ENTERTAINMENT

HDMI ESSENTIALS

Singular Solution

Crestron complete HDMI solutions enable high-performance HDMI signal management with groundbreaking features designed to deliver trouble-free switching and distribution of all your media.

HDMITM
HIGH DEFINITION MULTIMEDIA INTERFACE

2

DIGITAL MEDIA

Central Storage Live Streaming

With support for AirPlay, DLNA, and Bluetooth a central server can stream media wherever you are. Begin a movie in your theatre and finish it in your bedroom or more than one.

3 INVISIBLE SOUND

Pure aesthetics

Space saving, invisible and amazing sound quality are a homeowners dream. With speakers and amplifiers that can be embedded inside walls, this is easily achieved, with complete wireless connections.

Connect . Operate . Control Always . Anywhere

Central media server
HDMI matrix switcher
Wireless Class D Amplifiers
Start-resume-end media play anywhere
Multi-zone outputs
Scalable
Invisible installation possible

SHADES

Beautiful . Predictive . Convenient

AMBIENCE

3

CONVENIENCE

ENERGY EFFICIENCY

Future Sense

Selecting right shades and then operating them in optimum co-ordination with the rest of HVAC systems leads to high energy efficiency and cost savings.

2 AMBIENCE

Visual Stimulus

Shades add to, enhance and protect the interiors of any space. Lutron optimizes the use of shades to create supremely comfortable and pleasant places by syncing the shade operations, reducing operational noise and are an integral part of scene settings.

3 CONVENIENCE

Seamless and automated

One-touch operations, integration with the other systems, continual system updates and scene settings make shade operation a worry-free task. By integrating it with the other systems it leads to almost predictive operation.

Connect . Operate . Control Always . Anywhere

Comfortable and beautiful ambience

Quiet operations

Predictive controls

Remote operations

One-touch convenience

Stay in Control.

Centralized controls to drive everything
on your network to your tunes.
Everywhere. Anywhere. Always.

High-performance H.264 streaming video
Rava™ SIP intercom and phone technology
WAV file customizable audio feedback
Built-in microphone and speakers
5 soft-touch capacitive buttons
Single-wire Ethernet connectivity
PoE network powered

As you Need.

Fully customizable screens and interfaces, can also be customized for the functions and information on your beck-and-call.
